### Open letter from Efus members to the representatives of the European institutions

Efus (European Forum for Urban Security) General Assembly of local authorities met in Karlsruhe (Germany) on 13 May and published an open letter to the representatives of European institutions presenting their needs and expectations regarding future Justice and Security policies. Karlsruhe, 13 May ...

European Forum for Urban Security (EFUS)

### Mission Statement

The European Society for Prevention Research (EUSPR) will advance the science base of environmental, universal, selective and indicated prevention aimed at improving human health and well-being and addressing health inequalities.

European Society for Prevention Research (EUSPR)

## European Society of Criminology

The European Society of Criminology was founded in 2000. The Society aims to bring together in Europe persons actively engaged in research, teaching and/or practice in the field of Criminology.

### Conferences

The annual conferences of the Society provide an opportunity for the members to present papers on the results of their own research projects as well as learn about the research being done elsewhere in Europe. The conferences are also an occasion where the members can meet each other and discuss on mutual research interests; the meetings have already proved to be an important platform for new pan-European research initiatives.

### ChildrenCount Surveys

The ChildrenCount Surveys are a set of tools designed to paint a representative picture of the needs of all children from birth to adolescence in a given community or local authority.

The data - when aggregated up to the population-level - are designed to inform the development of investment strategies to improve child outcomes, guide the selection and implementation of evidence-based services and the design of new innovations.

The tools generate unparalleled data from approximately 600 parents of young children and up to 10,000 school-age children in a given area. These data are powerfully and dynamically visualised and considered alongside existing data on need and service use.

The ChildrenCount Surveys are an adapted version of the Evidence2Success methodology developed by the Social Research Unit at Dartington in partnership with the Annie E Casey Foundation and the Social Development Research Group.

Social Research Unit

## Our Mission

*The Society for Prevention Research is an organization dedicated to advancing scientific investigation on the etiology and prevention of social, physical and mental health, and academic problems and on the translation of that information to promote health and well being.*

The multi-disciplinary membership of SPR is international and includes scientists, practitioners, advocates, administrators, and policy makers who value the conduct and dissemination of prevention science worldwide.

Blueprints for Healthy Youth Development - A Research Project within the Institute of Behavioral Science

*Blueprints*  
FOR HEALTHY YOUTH DEVELOPMENT

BACKGROUND      AGENCY PROGRAM RATINGS      BLUEPRINTS CONFERENCE      LIFESKILLS TRAINING

## QUICK LINKS

Blueprints for Healthy Youth Development is a research project within the Center for the Study and Prevention of Violence, at the University of Colorado Boulder. The Blueprints mission is to identify evidence-based prevention and intervention programs that are effective in reducing antisocial behavior and promoting a healthy course of youth development. This website provides information on the Blueprints project (such as background and a dissemination project related to the model program LifeSkills Training).

## FACTS

Blueprints, created in 1996 to aid the State of Colorado in identifying and funding evidence-based programs, has reviewed more than 1,250 programs.

The Blueprints standard for certifying programs as "model" or "promising" is one of the highest in the field.

Blueprints hosts a biennial conference with a goal to promote the adoption of evidence-based programs and to provide information that supports effective and sustainable

## Updated Inventory of Evidence- and Research-Based Practices: Washington's Learning Assistance Program

Annie Pennucci, Matt Lemon

September 2014

Washington State provides funding to school districts to help underachieving students through the Learning Assistance Program (LAP). The 2013 Washington State Legislature directed the Washington State Institute for Public Policy to prepare an inventory of evidence-based and research-based effective practices, activities, and programs for use by school districts in LAP and to update the inventory each two years thereafter.

This report describes the updated inventory of evidence-based and research-based practices for use in LAP.

## Community Readiness for Change

The [Community Readiness Model](#) was developed at the Tri-Ethnic Center to assess how ready a community is to address an issue. The basic premise is that matching an intervention to a community's level of readiness is absolutely essential for success. Efforts that are too ambitious are likely to fail because community members will not be ready or able to respond. The Community Readiness Model has been used to assess readiness for a variety of issues, including drug and alcohol use, domestic and sexual violence, head injury, HIV/AIDS, suicide, parenting, animal control issues, and environmental issues.

International Society for  
Criminology (ISC)

Advancing research, services and awareness for victims

**The International Symposium on Victimology:** The premier event of the Society. Held every three years in a different country, and attended by hundreds of WSV members as well as academics and professionals from a wide variety of related fields. Discussions at these events focus on the many theoretical and empirical aspects of victimology, including -- but not limited to -- victimization surveys, victim rights, victim compensation, the role of victim in offences, victimization prevention, re-victimization, assistance to victims and to service providers, psychological responses to disasters, the role of the victim in the criminal justice system, and victims of the abuse of power. The Symposium also represents a networking and information exchange opportunity not to be missed!

**International Advocacy and Consulting:** The WSV maintains accredited representatives to the Council of Europe, and to United Nations offices in New York, Geneva, Vienna, Nairobi, and at other locations where the UN meets; up to 10 accredited members may represent the Society at each CoE or UN event relevant to victim issues. Any member in good standing may apply to the Executive Committee to be accredited to represent the Society at a specific event, meeting or office.

**Advocating for a full UN Convention on Justice and Support for Victims of Crime and Abuse of Power:** Ten years after the adoption of the *Declaration* by the UN General Assembly, several members of the Society were instrumental in the development of two important instruments meant to further the implementation of the *Declaration* around the globe. These documents, the [Guide for Policy Makers](#), and a Manual on the Implementation of the UN Declaration, provide policy-makers and practitioners with concrete examples of how they can push forward the implementation of the Declaration in their region.

Continuing with this tradition of global advocacy the World Society of Victimology, in partnership with the [International Victimology Institute \(INTERVICT\)](#) of Tilburg University, is currently involved in the development of a full [UN Convention for Victims](#) (latest draft).

**WSV sponsored workshops, courses and seminars:** These are held in many different countries. These have included four international workshops on Victim Rights, on Comprehensive Victim Assistance, on Minorities and Victimology, and on Abuse of Power.

Special two-week Post Graduate Courses in Victimology are held annually in Europe, Japan and South America. Announcements as to date, location and registration will be posted as they are made available.

**The Victimologist, Newsletter of the Society:** This quarterly newsletter has been published since 1982, keeping members informed and involved in Society matters, on news of interest, research within the field, and on victim assistance and victim rights in general. WSV members are encouraged to submit articles or information for publication.

# World Society of Victimology

THE IDEA

Parallel Justice redefines justice for victims of crime

**Justice** not only requires a fair and appropriate response to people who commit crimes; it also **requires helping victims of crime rebuild their lives**. This idea is called Parallel Justice.

THE BOOK

Parallel Justice is based on **guiding principles**. The book *Parallel Justice for Victims of Crime* can help you, your organization, or your entire community provide a more effective, humane and just response to victims of crime.

Join communities around the world working to achieve Parallel Justice for victims of crime.

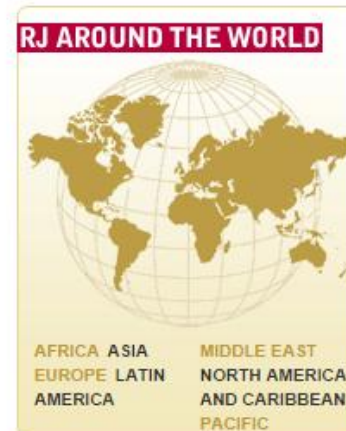

Parallel justice

Restorative justice emphasizes repairing the harm caused by crime. When victims, offenders and community members meet to decide how to do that, the results can be transformational.

To see how this approach is changing all aspects of criminal justice, visit the rooms above, the map to the right and the blog below.

## Crime Prevention and Criminal Justice

UNODC has the mission of making the world safer from crime, drugs, and terrorism. To be effective and sustainable, responses to these threats must include strategies covering the following areas:

- **Crime Prevention**, especially Urban crime prevention; Armed violence prevention; Prevention of recidivism
- **Criminal Justice Reform**: Police reform, Prosecution service, Judiciary (the courts), Access to legal defence and legal aid, Prison reform and alternatives to imprisonment, and Restorative justice
- **Justice for children; Support and assistance to victims; Gender in the criminal justice system**

Crime prevention and criminal justice strategies must take a human rights approach and be based on the rules of law, together with the [UN standards and norms in crime prevention and criminal justice](#).

## Fortschritte und Möglichkeiten. Was wissen wir und was können wir erreichen in der Präventionsarbeit für Jugendliche (IOM Report 2009)?

Dr. Harrie Jonkman

Verwey-Jonker Institute

19. DPT, Karlsruhe (2014)

Weitere Vorträge des 19. DPT

Seelische, emotionale und Verhaltensstörungen bei Jugendlichen verhindern: Fortschritte und Möglichkeiten

Seelische, emotionale und Verhaltensstörungen (SEV), wie Depressionen und Drogenmissbrauch bei Kindern, Jugendlichen und jungen Erwachsenen, stellen eine enorme Belastung für die Betroffenen, ihre Familien und die Gesellschaft dar. Sie bedrohen die Zukunft, Gesundheit und das Wohlbefinden junger Menschen. Anzeichen für mögliche SEV-Störungen sind oft in einem sehr jungen Alter deutlich. Die Forschung hat mehrere Faktoren identifiziert, die zur Entwicklung von SEV-Störungen beitragen könnten und Eingriffe entwickelt, um erfolgreich diese Faktoren zu bearbeiten. Durch die Anwendung von Strategien, Programmen und Praktiken, die sich auf die Verringerung von Risiken und die Förderung von Schutzfaktoren richten, besteht ein großes Potenzial, um die Zahl neuer Fälle von SEV-Störungen zu reduzieren und deutlich das Leben junger Menschen zu verbessern.

Das Institute of Medicine (IOM, USA) präsentierte vor kurzem einen wichtigen und umfassenden Bericht (Seelische, emotionale und Verhaltensstörungen bei Jugendlichen verhindern: Fortschritte und Möglichkeiten). Der Bericht macht deutlich: die Verhinderung der Entwicklung von SEV-Störungen, und der damit verbundenen Probleme bei jungen Menschen, die Verringerung der Risiken und die Förderung einer positiven psychischen Gesundheit sollte eine hohe Priorität für die Gesellschaft sein. Es ist wichtig für Familien, Politiker, Praktiker und Wissenschaftler, sich konzeptionell darüber zu verständigen. Der Bericht wird derzeit übersetzt und an die deutsche Situation angepasst. Das übersetzte Dokument wird beim Vortrag vorgestellt und soll für eine Diskussion aktueller Herausforderungen in der Jugendkriminalitätsprävention in Deutschland genutzt werden.
